e&oe

- all of our open convector fireboxes are powder coated making them suitable for use as outdoor fires.
- all of our open convector fireboxes are supplied ready to burn logs, with no additional items being required.
- all are delivered complete with a log tray, fuel retaining bars, operating tool and comprehensive instructions.
- a multi-fuel grid will be required if the fire is to be used with solid fuel and is available as an option listed below.
- a sturdy fine mesh sparkguard which securely locks in place is available as an option listed below.
- tortoise built-in and freestanding fireboxes incorporate an internally adjustable flue damper as standard.
- all built-in boxes can be supplied with a 3 or 4 sided flange for hearth mounting or for hole-in-the-wall settings.
- we offer a unique made-to-measure service for all product styles - please call to discuss your specific requirements.

* package price is for firebox with grid and sparkguard - a saving over items purchased separately.
